Install TensorFlow by Docker

WiLNA share 3

- > Visit Docker website, and download community edition for X.
- > <https://store.docker.com/search?type=edition&offering=community>
- > Install it.
- > Open your terminal, and run "docker --version" to check if docker is installed successfully.
- > Run "docker run -it -p 8888:8888 tensorflow/tensorflow" to install tensorflow.
- > After installation, a link will appear at the bottom of terminal. Copy the link and open it in browser.
- > YOU DID IT !
